

SRUJAN CHIDARLA

Baltimore, MD · srujanchidarla.uof@gmail.com · linkedin.com/in/srujan-chidarla · github.com/srujanchidarla · srujanchidarla.com

PROFESSIONAL SUMMARY

AI Engineer with production experience shipping **multi-model LLM systems** end-to-end. Built **JobHuntOS** — a Chrome Web Store extension with intelligent **Claude / Gemini / Groq** routing, SSE streaming, and provider failover across **100+ job-board formats**. Architecting **Neocortex**, a 15-agent life OS with a **6-provider LLM failover chain**. Grounded in **2+ years** of backend production work at **2M+ req/day** and **99.9% uptime** (Cognizant). MS in Computer Science (**4.0 GPA**, Aug 2026). Authorized to work in the U.S. via **STEM OPT** (36 months; no immediate H-1B sponsorship required).

TECHNICAL SKILLS

AI & LLM: Claude API, Gemini API, Groq API, prompt engineering, multi-model orchestration, LLM routing & failover, cost-aware provider selection, streaming token delivery

Backend & APIs: Node.js, Express.js, Python, FastAPI, REST APIs, Server-Sent Events (SSE), event-driven workflows

Browser & Frontend: Chrome Extension APIs (Manifest V3, content scripts, service workers), React, Next.js, TypeScript

Databases: MongoDB, PostgreSQL, Firebase/Firestore, Supabase, SQLite

Cloud & DevOps: AWS, Railway, Vercel, Docker, GitHub Actions, CI/CD

Core competencies: Production AI system design, graceful degradation on provider failure, BYOK privacy patterns, real-time coordination (Socket.io)

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions · Software Engineer — Backend / System Design

Hyderabad, India · Mar 2021 – Apr 2024 (Full-time, 2 yrs 7 mos)

Programmer Analyst (Full Stack), Nov 2022 – Apr 2024 · Program Analyst Trainee, Oct 2021 – Oct 2022

- Contributed to Spring Boot microservices processing **2M+ daily requests** with **99.9% uptime** for **500+ enterprise users**
- Built foundation in production reliability, API design, and operating systems at scale — directly applicable to AI service deployment
- Integrated Azure DevOps APIs to sync sprint data across platforms, improving team productivity by **20%**
- Supported Docker-based deployments and CI/CD workflows across dev, staging, and production
- Collaborated with senior engineers on system design, code reviews, and incident response

Technologies: Java, Spring Boot, MySQL, Angular, AWS, Docker, Azure DevOps, REST APIs

WalletGyde · Full-Stack Developer with Backend Focus (Internship)

Denver, CO (Remote) · Dec 2024 – May 2025

- Built Next.js API routes and Supabase (PostgreSQL) backend for a fintech platform (**35% engagement increase**)
- Improved transaction processing speed by **40%** through schema optimization and query tuning
- Implemented authentication and validation for sensitive financial workflows

- Raised mobile Lighthouse performance scores by **30%**

Technologies: Node.js, Next.js, PostgreSQL, Supabase, REST APIs

University of Fairfax · MS Computer Science (Coursework & AI Projects)

Fairfax, VA · Aug 2024 – Aug 2026 (Expected)

- Maintaining **4.0/4.0 GPA** while shipping AI products (JobHuntOS, Neocortex) and completing graduate coursework
 - Coursework: system design, distributed systems, computer networks (TCP/IP, BGP/OSPF), advanced algorithms
 - Applying production backend discipline to LLM orchestration, streaming APIs, and multi-agent architecture
-

SELECTED PROJECTS — AI FOCUS

JobHuntOS · Production Multi-Model LLM System — Live on Chrome Web Store

job-hunt-os-eosin.vercel.app · [Chrome Web Store](#)

- Shipped MV3 Chrome extension analyzing job postings across **LinkedIn, Greenhouse, Workday, Lever**, and **100+ ATS format variations**
- Architected multi-provider LLM routing engine with intelligent provider selection and automatic failover:
 - **Claude** for complex reasoning and context understanding
 - **Gemini** for fast analysis and parallel processing
 - **Groq** for speed-critical operations
- Implemented **SSE streaming** for real-time token delivery with connection lifecycle management
- Engineered multi-stage prompt pipeline: job extraction → keyword matching → resume tailoring
- Built PDF/DOCX resume generation pipeline; optional **Notion API** integration for application tracking
- Deployed on **Railway** with retry logic, error handling, and graceful degradation on provider failures
- **Result: ~2 min per application** (vs. hours manually); live on Chrome Web Store

Stack: TypeScript, Node.js, Express, Chrome MV3, Claude/Gemini/Groq APIs, SSE, PDF/DOCX, Railway

Neocortex · 15-Agent Multi-Agent AI System (In Development)

github.com/srujanchidarla/neocortex

- Architecting local-first life OS with **15 specialized domain agents** (fitness, career, learning, planning, and more)
- Building FastAPI backend with **6-provider LLM failover chain**, per-agent prompts, and inter-agent messaging
- Designing persistent memory: long-term goals, short-term context, and agent state in SQLite
- Implementing **Heisenberg safety layer** with per-agent kill switches; **37 backend test suites**
- Optimizing cost via provider selection based on request complexity and urgency

Stack: Python, FastAPI, Next.js, Expo, SQLite, n8n, multi-agent orchestration, LLM routing

CampfireChai · AI-Assisted Trip Planning — Live on Vercel

campfire-chai.vercel.app · [GitHub](#)

- Integrated **Magic Paste** AI trip drafting: natural-language trip descriptions → structured itineraries
- Built multi-provider LLM fallbacks for AI-assisted trip planning with prompt engineering for vague or conflicting inputs

- Combined AI features with Socket.io real-time backend for collaborative trip coordination across **15+ US metro hubs**
- Deployed full-stack product live on Vercel with JWT auth and geo-based trip discovery

Stack: React 19, Node.js, Express, MongoDB, Socket.io, LLM APIs, Vercel

AlgoChronicle · Event-Driven Automation Pipeline — Live on Vercel

algochronicle.vercel.app · [GitHub](#)

- Engineered **GitHub Actions** → **Next.js API** → **Firestore** pipeline for zero-manual publishing after git push
- Parsed structured README metadata (C++, Java, Python solutions) into streak stats, platform breakdowns, and RSS feeds
- Designed Firestore schema for contributions, streaks, and analytics aggregation

Stack: Next.js, TypeScript, Firebase/Firestore, GitHub Actions, REST APIs

EDUCATION

University of Fairfax · Master of Science in Computer Science

Aug 2024 – Aug 2026 (Expected) · **GPA: 4.0/4.0** · Fairfax, VA

Relevant coursework: System Design, Distributed Systems, Computer Networks, Advanced Algorithms

VNR Vignana Jyothi Institute of Engineering & Technology (VNR VJIET) · B.Tech, Information Technology

Aug 2018 – Aug 2021 · **GPA: 3.8/4.0** · Graduated with Honors · Hyderabad, India

CERTIFICATIONS

- **Prompt Engineering: How to Talk to the AIs**, LinkedIn Learning (Mar 2026) — [Certificate](#)
 - **Generative AI Fundamentals**, Databricks (Jan 2026)
 - **AWS Cloud Practitioner** (May 2026) — [linkedin.com/in/srujan-chidarla](https://www.linkedin.com/in/srujan-chidarla)
 - **Google UX Design Professional Certificate** (Feb 2026) — [Coursera](#)
 - **Learning Next.js**, LinkedIn Learning (Feb 2025)
 - **HackerRank Problem Solving (Basic)** (2024) — hackerrank.com/certificates/B5F731D6723F
-

ADDITIONAL

- **GitHub**: 41 repositories, 303+ contributions/year, Pull Shark — github.com/srujanchidarla
 - **Google Local Guide Level 9**: 10k+ contributions, 52k+ points, 58M+ views
 - Multi-sport athlete; state-level medals — discipline under performance pressure
-
