PROFESSIONAL SUMMARY

Full-Stack Engineer who ships complete products from UI to database to deployment. **5+ applications** in production or live beta — **CampfireChai** (Vercel), **JobHuntOS** (Chrome Web Store), **AlgoChronicle** (Vercel), **StudyGlobal** (live beta), and **Neocortex** (in active development). Strong across **React 19**, **Next.js**, **Node.js**, **Express**, **FastAPI**, real-time systems (**Socket.io**), and AI feature integration. **2+ years** production foundation at **2M+ req/day** and **99.9% uptime** (Cognizant). MS in Computer Science (**4.0 GPA**, Aug 2026). Authorized to work in the U.S. via **STEM OPT** (36 months; no immediate H-1B sponsorship required).

TECHNICAL SKILLS

Frontend: React 19, Next.js, TypeScript, JavaScript, Tailwind CSS, Vite, responsive/mobile-first UI, component architecture

Backend: Node.js, Express.js, Python, FastAPI, Java, Spring Boot, REST APIs, Socket.io, SSE streaming

Databases: MongoDB, PostgreSQL, MySQL, Firebase/Firestore, Supabase, SQLite; schema design, indexing, query optimization

Cloud & DevOps: AWS, Docker, Vercel, Railway, Netlify, GitHub Actions, CI/CD, Git

AI integration: Claude API, Gemini API, Groq API, prompt engineering, LLM routing with failover

Core competencies: End-to-end ownership, rapid MVP shipping, real-time coordination, product thinking, deployment automation

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions · Software Engineer — Full-Stack / Backend

Hyderabad, India · Mar 2021 – Apr 2024 (Full-time, 2 yrs 7 mos)

Programmer Analyst (Full Stack), Nov 2022 – Apr 2024 · Program Analyst Trainee, Oct 2021 – Oct 2022

- Contributed to Spring Boot microservices and Angular web applications for **500+ enterprise users** at **2M+ daily requests** and **99.9% uptime**
- Reduced page load times by **30%** through SPA routing and frontend optimization
- Integrated Azure DevOps APIs to sync sprint data across platforms, improving team productivity by **20%**
- Supported Docker-based deployments and CI/CD workflows across dev, staging, and production
- Collaborated with senior engineers on system design, code reviews, and production reliability

Technologies: Java, Spring Boot, Angular, MySQL, AWS, Docker, Azure DevOps, REST APIs

WalletGyde · Full-Stack Web Developer (Internship)

Denver, CO (Remote) · Dec 2024 – May 2025

- Shipped fintech platform end-to-end with **Next.js + Supabase (PostgreSQL)** — dashboard, transactions, and analytics
- Drove **35% engagement increase** through improved UX and full-stack feature delivery
- Improved transaction processing speed by **40%** through backend optimization and schema tuning
- Raised mobile Lighthouse performance scores by **30%**

- Implemented authentication and validation for sensitive financial workflows

Technologies: Next.js, Node.js, PostgreSQL, Supabase, Tailwind CSS, REST APIs

University of Fairfax · MS Computer Science (Coursework & Shipped Products)

Fairfax, VA · Aug 2024 – Aug 2026 (Expected)

- Maintaining **4.0/4.0 GPA** while shipping **CampfireChai**, **JobHuntOS**, **AlgoChronicle**, **StudyGlobal**, and building **Neocortex**
 - Coursework: system design, distributed systems, computer networks, advanced algorithms
 - **13+ projects** spanning full-stack, AI integration, and real-time systems
-

SELECTED PROJECTS — SHIPPED PRODUCTS

CampfireChai · Full-Stack Community Platform — Live on Vercel

campfire-chai.vercel.app · [GitHub](#)

- **Frontend:** React 19 + Vite SPA — trip discovery, meetups, bucket lists, permits, crew matching across **15+ US metro hubs**
- **Backend:** Express 5 + MongoDB API — JWT auth, geo trip search, hub-based content, complex trip/user/carpool relationships
- **Real-time:** Socket.io trip chat, shared logistics (gear, meals, carpools), and member approvals
- **AI:** Magic Paste trip drafting with multi-provider LLM fallbacks for natural-language → structured itineraries
- **DevOps:** Monorepo deployed on Vercel with environment management and iterative user feedback

Stack: React 19, Node.js, Express, MongoDB, Socket.io, Vite, Tailwind CSS, Vercel

JobHuntOS · Full-Stack AI Chrome Extension — Live on Chrome Web Store

job-hunt-os-eosin.vercel.app · [Chrome Web Store](#)

- **Frontend:** Chrome MV3 extension — content scripts, service worker, shadow-DOM form scanning, popup UI for CSP-restricted sites
- **Backend:** Node.js/Express API with **SSE streaming**, multi-provider LLM routing (Claude/Gemini/Groq), and provider failover
- **Data layer:** Extraction pipeline for **100+ ATS/job-board formats** (LinkedIn, Greenhouse, Workday, Lever, and more)
- **Features:** Resume PDF/DOCX generation, recruiter discovery, optional Notion tracking; privacy-first BYOK model
- **Result:** **~2 min per application**; shipped to Chrome Web Store with Railway backend

Stack: TypeScript, React, Node.js, Express, Chrome MV3, LLM APIs, Railway, GitHub Actions

StudyGlobal · Full-Stack EdTech Platform — Live Beta

studyglobalscholar.netlify.app

- **Frontend:** Next.js + TypeScript responsive UI — cost-of-living calculator, visa timelines, document vault
- **Backend:** REST APIs integrating university and cost-of-living data into student relocation workflows
- **Database:** Relational/document schema for visa workflows, applications, and supporting paperwork
- **Auth:** Session-based authentication with role separation for students and admin flows
- **Result:** **40% faster visa workflows** through query optimization and streamlined user journeys

Stack: Next.js, TypeScript, PostgreSQL, Auth.js, API integrations, Netlify

AlgoChronicle · Automated Full-Stack Publishing Pipeline — Live on Vercel

algochronicle.vercel.app · [GitHub](#)

- **Frontend:** Next.js dashboard — streak tracking, platform/complexity stats, RSS feed, spaced-revision views
- **Backend:** Next.js API routes ingesting parsed commit metadata from GitHub Actions webhooks
- **Automation:** Push → GitHub Actions → API parsing (C++, Java, Python) → Firestore sync → live site update
- **Result:** Zero manual logging after push; **40-day schedule** with real-time progress tracking

Stack: Next.js, TypeScript, Firebase/Firestore, GitHub Actions, Vercel

Neocortex · Full-Stack Multi-Agent Life OS (In Development)

github.com/srujanchidarla/neocortex

- **Frontend:** Next.js command center + **Expo** mobile HUD (health, meals, morning briefs)
- **Backend:** FastAPI monorepo with **15 domain agents**, SQLite persistence, and **6-provider LLM failover**
- **Architecture:** Event-driven agent coordination, Heisenberg safety layer, **37 backend test suites**
- **Agents:** Jarvis (planning), Stark (career), Hercules (fitness), Turing (SRS), Cicero (interviews), and more

Stack: Next.js, Expo, Python, FastAPI, SQLite, n8n, multi-agent LLM orchestration

FitConnect · HealthTech Booking Platform

- Designed full-stack venue booking system: facility search, trainer discovery, scheduling, and real-time slot updates
- **Result:** **60% increase in bookings** through conflict-free scheduling and clearer UX

Stack: React, Node.js, PostgreSQL, real-time coordination, system design

EDUCATION

University of Fairfax · Master of Science in Computer Science

Aug 2024 – Aug 2026 (Expected) · **GPA: 4.0/4.0** · Fairfax, VA

VNR Vignana Jyothi Institute of Engineering & Technology (VNR VJIET) · B.Tech, Information Technology

Aug 2018 – Aug 2021 · **GPA: 3.8/4.0** · Graduated with Honors · Hyderabad, India

CERTIFICATIONS

- **Google UX Design Professional Certificate** (Feb 2026) — [Coursera](#)
- **Learning Next.js**, LinkedIn Learning (Feb 2025) — [Certificate](#)
- **Prompt Engineering**, LinkedIn Learning (Mar 2026)
- **Generative AI Fundamentals**, Databricks (Jan 2026)
- **AWS Cloud Practitioner** (May 2026)
- **HackerRank Problem Solving (Basic)** (2024) — hackerrank.com/certificates/B5F731D6723F

ADDITIONAL

- **GitHub:** 41 repositories, 303+ contributions/year, Pull Shark — github.com/srujanchidarla
- **Google Local Guide Level 9:** 10k+ contributions, 52k+ points, 58M+ views
- Multi-sport athlete; state-level medals — teamwork and discipline under pressure
